## Introducing Syn-Glide Film

Syn-Glide Film is the only material available on the market today that reduces 70% of cover friction by allowing the cover to glide over itself or a piece of hardware. Syn - Glide is an important accessory for every rigger that works with Twin-Path® Slings.

Syn-Glide is designed to eliminate the 'bite' of the Covermax® cover in situations where the cover is resting on itself when the weight of a load is applied.

**SLINGMAX** ⚡<sup>®</sup>  
RIGGING SOLUTIONS

**SYN-Glide Pads are important accessories for jobs that are tough on slings**

**SYN-Glide allows the sling to take set without friction for lifts where the Covermax<sup>®</sup> cover comes in contact with itself or a piece of hardware.**

## **Syn-Glide will:**

- Decrease cost of job
- Eliminate large shackles & hardware
- Increase job-site safety
- Increase job speed
- Significantly reduce the need for sling repair
